PROFILE

Frontend engineer passionate about user experience, I've been designing modern, smooth, and responsive web and mobile interfaces for the past 4 years. Specialized in React.js, I also build mobile apps using React Native and Expo, with a strong focus on pixel-perfect UI and optimized performance. Curious, autonomous, and detail-oriented, I consistently strive to combine aesthetics, accessibility, and efficiency to deliver engaging user experiences.

PROFESSIONAL EXPERIENCE

Maxing US 2025 - 2024
iOS Mobile App - AI-powered Life Coach
Co-founder & CTO

- Designed and implemented a scalable front-end architecture using Expo and Redux, along with a serverless Supabase backend including authentication, database, and webhooks.
- Fully integrated the OpenAI API to dynamically generate personalized content using prompt engineering.
- Set up the build and deployment pipeline with EAS (OTA updates, App Store, TestFlight) and GitHub Actions, with production monitoring via Sentry and an optimized crash rate.

Nutravalia 2024 - 2022
Front-End Developer (React.js)

- Developed two internal React applications for sales and field training teams, featuring complex forms integrated with the Salesforce API and real-time data updates.
- Optimized front-end code for pixel-perfect, responsive, and high-performance rendering across desktop and tablet; contributed to continuous improvement through code reviews with the CTO.
- Implemented automated testing, CI/CD pipelines, linting, and codebase standardization; contributed to UX improvements resulting in a 35% increase in average order value and 15% increase in LTV.

EDUCATION

Titre Professionnel niveau 6 (bac +3/4) 2019 - 2020
Développeur d'Applications JavaScript avec React

- Obtenu auprès de : OpenClassrooms
- Reconnu par l'État : Certification RNCP (Répertoire National des Certifications Professionnelles).
