RESUME

Front-end engineer specializing in React and React Native, with 2+ years of production experience and a founder's mindset. I ship web and mobile products end-to-end from pixel-perfect UI to Supabase back-ends and AI-powered features.

After launching my own apps, I spent two years going deep on distribution and product-market fit (sales, acquisition), while continuing to build the tech behind it.

I'm now returning to engineering full-time, bringing a rare mix of product, distribution, and shipping instincts.

EXPERIENCE

Sales Development Representative

RealAdvisor

📅 Sep 2025 – Present 📍 Remote

- Built a lead-cleaning tool (React) backed by an n8n + Supabase back-end to automate and speed up prospecting.
- Built a React Chrome extension connected to the CRM to focus cold-call volume on the highest-intent leads, driving more opportunities and closed deals.
- Built a React dashboard to track the sales pipeline in real time, surfacing bottlenecks and pinpointing where they come from.
- Generated 75 new clients through prospecting powered by these tools at 2,800€ ACV, 210,000€ in total contract value.

Founder & Mobile Engineer

BC Taps

📅 Sep 2024 – Aug 2025 📍

Remote

- Designed and shipped two B2C mobile apps (Maxing Us & Teazmo) with React Native, Expo & Expo Router.
- Built a serverless Supabase back-end (auth, database, webhooks) and integrated OpenAI to generate personalized, dynamic content in Maxing Us.
- Set up EAS build/deploy pipelines (OTA, App Store, TestFlight) with GitHub Actions and Sentry monitoring; reached 1,000+ users in the first month through 100% organic content (TikTok, Reddit, DMs).

Front-End Engineer

LUXÉOL (Nutravalia)

📅 Oct 2022 – Sep 2024 📍 Mougins, France

- Built two internal React apps for sales and field-training teams, with complex forms wired to the Salesforce API and real-time data updates.
- Delivered pixel-perfect, responsive UI across desktop and tablet; drove continuous improvement through code reviews with the CTO.
- Implemented automated tests, CI/CD, linting and codebase standardization; contributed to UX work that lifted average order value +35% and LTV +15%.

SKILLS AND INTERESTS

Languages: TypeScript, JavaScript (ES6+)

Web: React, Tailwind CSS, Zustand, CSS-in-JS, Sass

Mobile: React Native, Expo, Expo Router

Back-end & Data: Supabase (auth, DB, webhooks), n8n

AI / LLM: OpenAI/Gemini/Claude/Deepseek

Testing: Jest, Cypress, Detox

Tooling / DevOps: Git, GitHub, GitHub Actions, EAS, Sentry

Methodologies: Agile, Scrum, TDD, Clean Code, SOLID

ACHIEVEMENTS

BC Taps

- 1,000+ users in the first month, 100% organic (TikTok, Reddit, DMs)
- 2 React Native apps shipped to the App Store

LUXÉOL (Nutravalia)

- +35% average order value and +15% LTV via front-end & UX work
- Real-time Salesforce-connected internal apps adopted by sales & training teams

STRENGTHS

Ships end-to-end

- Takes products from pixel-perfect UI to back-end and deployment
- Comfortable across web (React) and mobile (React Native / Expo)

Product & entrepreneurial mindset

- Understands distribution, acquisition, and product-market fit
- Builds what moves the metric, not just what's requested

AI-augmented engineering

- Integrates LLMs and automation into real products and workflows

CERTIFICATION

OpenClassrooms

Level 6 Professional Title (bac +3/4)

JavaScript / React Application Developer

State-recognized (RNCP) · 2019 – 2020
